

HAMMAD AHMED

React.JS Developer

About Me

A ReactJS developer with a passion for creating dynamic web interfaces. Self-starter with hands-on project experience and a commitment to continuous learning. While I may not have formal work experience, I bring a portfolio of projects that showcase my skills

Karachi University-UBIT

BS (Computer Science)
2020-Present

Adamjee College

Pre-Engineering
2018-2020

COURSES

Alkhidmat - Bano Qabil

MERN Stack
3/2023 - 9/2023

Aptech Metro Stargate

Web Designing
2022

PROJECTS

Mazdoor App

Web app connecting users with skilled technicians, with filters for categories, hourly rates, experience, contact info and many more. Technicians can also register, and local storage ensures data persists after reloads. It is built with ReactJS and MUI

Cricket Scoring App

This Cricket Scoring App simplifies the scoring process, allowing you to concentrate on the game. With its intuitive features and real-time score updates, it's the ideal tool for players, coaches, and umpires to keep track of scores. It is built with ReactJS

Inventory Management System

An inventory management system with local storage support for tracking products, quantities, and units. Features include add, update, delete, search, and also incrementing and decrementing the product quantities. It is built with ReactJS and MUI

World Map

Created a world map app with region and country name search functionality. Used an API to get information about countries. Users can also explore detailed country information.

Portfolio

Built with reactJS, this website showcases who I am, what can I do and which projects I have worked on.
